

## TEVAC MOLD SHIELDS

**Mold Shields™** prevent your parts from scattering randomly outside the drop zone. Mold Shields™ crystal clear plastic curtain allows you to observe your molding area, and monitor your production in progress. For larger applications, multiple shields may be used on a mold. Mold Shields™ are easily attached and removed as necessary. *Each Mold Shield™ Kit contains 2 Mold Shields™, mounting hardware, and the required number of attaching magnets*

**EASY INSTALLATION!  
ELIMINATES CONTAMINATION!  
REDUCES SCRAP!**

Tevac No.	Description
MS-08	Mold Shield 8" High

48" x 48" only	GC-4848-SC	GC-4848-PC
48" x 52" only	GC-4852-SC	GC-4852-PC
51" x 51" only	GC-5151-SC	

**Gaylord Covers** Unique design prevents raw material from becoming contaminated from air born dirt, dust and other unwanted debris by keeping the material securely covered within the container. Easy installation. Special openings for regrind and other custom applications. *Universal sizing* means you can reduce your Gaylord cover inventory.

**Drum Covers** prevent raw materials from becoming contaminated from air born dirt, dust and other unwanted particles. Drum covers are easy to install and remove. The universal sizing means fewer covers are required to fit a wider variety of drums. Standard Wand Openings are 2.75". Special Openings from 6"-10" for regrind equipment. *Custom Sizes are available.*

**ELIMINATES CONTAMINATION!  
EASY INSTALLATION! INCREASES PROFITS!

Double wand opening	DC-2D
Single wand opening with Single Centered Opening 6" to 10" diameter	DC-1S-O
Double wand opening with Single Centered Opening 6" to 10" diameter	DC-2D-O

**Tie Bar Covers** - Molders use Tie Bar Covers to protect their moldings from unwanted contamination from contact with tie bar grease. Tie bars can also protect your machine from in-mold labeling by preventing labels from getting into the tie bar bushings and causing excessive wear. Tie Bar Covers are made of tough, oil resistant polyester material with plastic zippers. Tie Bar Covers are mounted to the mold using magnet sets and use industrial strength zippers to secure the covers over the tie bars.

Tie bar cover length = platen maximum opening and must be specified when ordering. A complete set of tie bar covers contains 4 covers complete with mounting hardware.

Tie Bar Diameter	Tie Bar Length	Tevac Number	Tie Bar Diameter	Tie Bar Length	Tevac Number
